

Mojave Ground Squirrel Habitat Restoration Father Crowley Area

Exerpts from Justin's field notes:

Date: 6-19-02

Weather: Sunny with a comfortable breeze. *PERFECT*

Mood: I was very upbeat today.

Objective: Create habitat for the Mojave Ground Squirrel as mitigation for habitat destroyed when the NPS creates a road pull off on HWY 190.

Description of Work: We dug pits and moved rocks to remove traces of a closed road and restore the habitat of the Mojave Ground Squirrel.

I felt the project was a huge success because we completely camouflaged the road and it prevents visitors from driving on it. We also enabled it to return to its natural state more quickly.
